Sperm Donors

### Welcome

We offer surrogacy service for intended parents from all over the world!

At the hart of our business is a very simple idea. IVF technologies are the basis for the surrogacy program. They have existed already more then 25 years. We could say that IVF technologies are not unique and exceptional or the technologies that are held experimentally in single laboratories any longer, they tuned to be routine medical procedure. Today many specialists from the clinics from all over the world have become proficient in IVF technologies...
