

ETHIOPIA ADOPTION

Villa Hope is proud to network with Christian World Adoption to assist prospective adoptive parents with the adoption of children from Ethiopia!

Children Available: Infants, toddlers, sibling groups and older children who are available for adoption will be examined and tested for HIV, hepatitis, and tuberculosis. Parents will receive biographical and medical information on a referred child, which will include photographs. Applications are being accepted and families may request boys, girls, sibling groups, or two unrelated children.

Requirements: At this time we are only accepting applications for married couples. Married couples must be married for at least one year. Requirements are flexible on age of applicants and number of children in the home.

Waiting Child Program: There are many children available for international adoption in the Waiting Child Program. Sibling groups of older children are the most common. You may request to view the children in the Waiting Child Program by contacting [Emily Beddingfield](#), Christian World Adoption Waiting Child Coordinator.

Timeline: Shortly after the dossier goes to the country a child or infant is assigned. The current wait for boys is 0-2 months and the wait for girls is 6-9 months. Travel to Ethiopia to bring the child home is approximately 5-6 months later. The stay in the country is approximately 1 week.

Approval for the adoption of a child/ren in the Waiting Child Program may be faster.
