

Don't be afraid sweet child, God has heard your cry.
 Across the ocean, in our hearts, he's placed a love that will not die.

from Anastasia by Kevin Hollinger

We have a very active adoption program in Guatemala, on multiple fronts.

In addition to having assisted hundreds of families through the adoption process, we are now constructing an orphanage in the region of Zacapa, where 40 homeless children will be nurtured and cared for while they await placement into homes.

Typically, we place children into loving private foster homes or in small group homes called hogars.

At this time, we have infants through school age children that are available, and they are generally very healthy. Our staff makes frequent trips to meet the children, and talk to private attorneys who specialize in Americans adopting from Guatemala. This program is an excellent choice for families who want to adopt young children or who want a short travel time. Learn more by contacting us today!

In one year, Guatemalan police have publicly executed up to 40 street children and injured hundreds more. The government admits to only 5,000 street children in Guatemala City. (Relin)
